Chess friends ⁱ

The pupils are going to know about chess game, learn about chess rules, chess history and play in their school and online with pupils from partner schools. They will deal with the aesthetics of the chessboard and pieces, they will build their own and use their bodies to choreograph a chess pieces dance or to represent a chess battle.

- Here below you can see rows, lines and diagonals of the board:

row

line or column

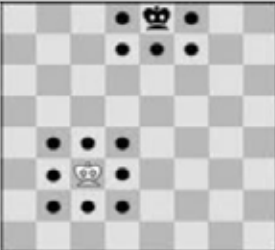

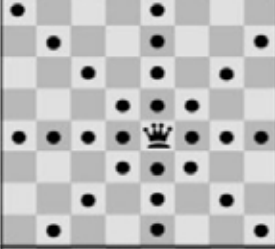

main diagonals

- On a chessboard there are 64 squares and each square has a unique description.

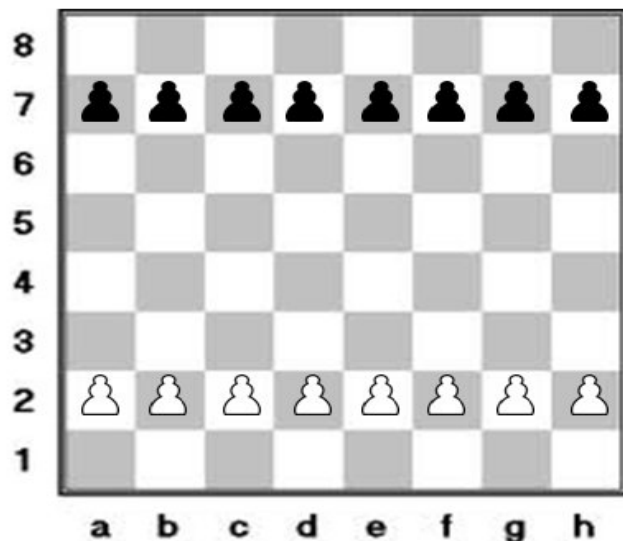

8	a8	b8	c8	d8	e8	f8	g8	h8
7	a7	b7	c7	d7	e7	f7	g7	h7
6	a6	b6	c6	d6	e6	f6	g6	h6
5	a5	b5	c5	d5	e5	f5	g5	h5
4	a4	b4	c4	d4	e4	f4	g4	h4
3	a3	b3	c3	d3	e3	f3	g3	h3

- The value and movement of Chess Game Pieces :*

	KING (K)	-	
	QUEEN (Q)	10 points	
	ROOK (R)	5 points	
			

Exercise 3: The pawn

In this exercise we are going to use only the pawns, positioned on their regular places. The player who manages to get one of his pawns to the end of the chessboard, wins the first “battle”. Then the players change colors and they play again. But this time the player who has lost, starts with a pawn less. So, the players continue. The one who has, after some “battles”, only 3 pawns, loses the game.
